

Md Sadique Amin

Java Backend Engineer | Spring Boot Developer | Microservices Enthusiast

madsadiqueamin721786@gmail.com • +91 9318302850 • [linkedin.com/in/md-sadique-amin](https://www.linkedin.com/in/md-sadique-amin) • github.com/sadiqueamin

Begusarai, Bihar, India • Immediate Joiner • Expected CTC: 4-8 LPA

Professional Summary

Motivated **Java Backend Engineer** with hands-on internship experience building enterprise Java applications using **Spring Boot** and **microservices architecture**. Proficient in **Core Java (8/17/21)**, **Spring Data JPA**, **Hibernate**, **REST APIs**, and **MySQL**. Experienced with **Apache Kafka**, **Redis**, **Eureka Service Discovery**, **API Gateway**, and **Docker**. Strong foundation in OOP, design patterns, Collections, Streams API, and version control via Git. Seeking an entry-level **SDE-1 / Java Developer** role at product-based or service-led companies such as Deloitte, HashedIn, Oracle, and Amazon. **Technical**

Skills

Languages & Core Java: Java 8, Java 17, Java 21, OOP, Collections, Streams API, Multithreading, Design Patterns, SQL

Spring Ecosystem: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security (JWT), Spring Cloud, Eureka, API Gateway

Microservices & APIs: Microservices Architecture, REST API, Swagger/OpenAPI, Service Discovery (Eureka), API Gateway Routing, Resilience4J (Circuit Breaker)

Messaging & Caching: Apache Kafka (Producer-Consumer, DLQ), Redis (Caching, Session Management)

Databases: MySQL, PostgreSQL (basics), MongoDB (basics)

DevOps & Tools: Docker, Docker Compose, Git, GitHub, Maven, Postman, JUnit, Mockito, Linux

Familiar / Currently Learning: AWS (EC2, S3), Jenkins, GraphQL, gRPC, React.js, Python, TensorFlow, Apache Spark

Work Experience

Keyanna Technology Pvt Ltd

Ahmedabad, India | 2024 – Present

Software Engineering Intern

- Developed backend modules using **Spring Boot** and **Spring Data JPA** for enterprise Java applications.
- Designed and implemented **RESTful APIs** following best practices — request/response handling, validation, and error management.
- Worked on **MySQL** database design, wrote complex queries, and performed query optimization and debugging.
- Participated in building a **microservices-based architecture** using Spring Boot, Eureka Service Discovery, and API Gateway routing.
- Assisted in **Docker containerization** of applications and environment setup using Docker Compose.
- Used **Git/GitHub** for version control with feature-branch workflows and pull request code reviews.
- Wrote unit tests using **JUnit** and **Mockito** to ensure code reliability and coverage.
- Actively participated in Agile sprints, daily stand-ups, and peer code reviews.

BSNL

India | 2 Months

Industrial Trainee

- Gained practical exposure to network infrastructure, server administration, and Linux-based system management.
- Documented technical workflows and assisted the engineering team with diagnostics and operational reporting.

Projects

Telecom Microservices Platform

Spring Boot, Eureka, API Gateway, Kafka, Redis, MongoDB

- Designed a distributed order management system for the telecom domain with independent **inventory, billing, and notification** microservices.
- Used **Eureka** for dynamic service discovery and **API Gateway** for centralized routing and authentication filtering.
- Implemented **Apache Kafka** for event-driven asynchronous communication between services and **Redis** caching for high-frequency reads.
- Achieved a scalable, fault-tolerant microservices setup with asynchronous messaging and dynamic service registration working end-to-end.

Spring Boot E-Commerce Backend (EntityKart)

Spring Boot, Spring Data JPA, MySQL, JWT, Redis, Swagger

- Built a complete e-commerce backend with product catalog, shopping cart, and order processing modules.
- Implemented **JWT-based authentication** with role-based access control (Admin / Customer roles).
- Used **Redis** for session management and response caching, reducing database load significantly.
- Documented all APIs with **Swagger/OpenAPI** for easy onboarding and tested with Postman.

Kafka Event Streaming & Notification System

Spring Boot, Apache Kafka, WebSocket, MySQL, Docker

- Developed a real-time notification system using the **Kafka producer-consumer model** for email and SMS alert delivery.
- Implemented **Dead-Letter Queue (DLQ)** handling for failed messages, ensuring zero data loss on consumer errors.
- Containerized the entire stack using **Docker** and orchestrated locally with **Docker Compose**.

API Gateway & Service Discovery System

Spring Cloud Gateway, Eureka, Resilience4J, Docker

- Designed an **API Gateway** routing requests to multiple backend microservices based on URL path patterns.
- Integrated **Eureka Server** for dynamic service registration and client-side load balancing.
- Applied **Resilience4J circuit breaker** pattern to prevent cascading failures across services.

Education

B.E. – Computer Science & Engineering (2023–2026)

Government Engineering College Patan **CGPA: 8.4 / 10 (Grade: A)** Pursuing **Diploma – Computer**

Science & Engineering (2021–2023)

MANUU Polytechnic **85% (Grade: A+)** **Relevant Coursework:** Data Structures & Algorithms,

Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming. **Certifica-**

tions

- **Spring Boot 3 & Spring Framework 6** — Udemy (2024)
- **Apache Kafka for Beginners** — Confluent (2024)

- **Docker Mastery** — Udemy (2024)
- **Java Programming Masterclass** — Udemy (2023)

Achievements

- Completed **6+ backend projects** using Spring Boot and microservices during internship and self-directed learning.
- Diploma batch **top performer** — achieved 85% (Grade A+) at MANUU Polytechnic, 2021–23.
- Consistently maintained **CGPA 8.4 (Grade A)** throughout core CS coursework at GEC Patan.
- Active participant in college coding club and technical hackathons; strong team collaborator in Agile environments.
